

WEATHERPAK® Preventive Maintenance and Inspection (PMI) Service

for TRx, TRx², MTR, EOC, PoE, 2000, and 6800 WEATHERPAK®s

PMI Includes:

- *Customer notification of annual PMI service date*
- *All basic preventive maintenance and inspection services*
- *Cleaning of unit*
- *Replacement of O-rings, dessicant, hard-hat filter*
- *Replacement of WEATHERPAK® CPU back-up battery (if needed)*
- *Alignment of compass, barometer, wind sensor vane (as needed)*
- *Decal replacement (as needed)*
- *Final acceptance/return-to-service tests*
- *Continental US return shipping (if outside continental US, customer must pay return shipping costs)*

1-Year and 3-Year Service Options

Coastal offers both a 1-year and a 3-year standard maintenance program (Preventive Maintenance and Inspection Service, or PMI) for your WEATHERPAK® weather station.

If any major repairs are needed at time of PMI Service, Coastal will contact you with a quote for the additional repair costs. Turnaround time for the repair will be no more than 10 days from receipt of the unit(s).

In addition to everything included as preventive maintenance, you'll receive special priority for ANY unplanned maintenance actions. Coastal will provide a 10-day turnaround time for non-preventive maintenance repairs. (Note this assumes approval of Coastal's repair quote within 3 days of receipt.)

Pricing:

Call for quote.

Note that special PMI service pricing is available for WEATHERPAK® quantities of 5 or greater. We also offer such PMI service for ZENO® and other Coastal weather stations.

Please contact your Coastal representative for additional information regarding PMI for WEATHERPAK®, ZENO® and other Coastal products.
