## WEATHERPAK® 400 TRx & VM Display

The WEATHERPAK® 400 has been keeping First Responders from becoming First Casualties for more than 20 years. It is the *only* Portable Weather Station designed *specifically* for HazMat and First Response. Rugged, accurate, and reliable, the WEATHERPAK® is designed to withstand rough handling and harsh conditions.

The WEATHERPAK® Receiver/Display unit is included in the purchase of a WEATHERPAK® 400 TRx (tripod) or VM (vehicle mounted) Weather Station. You can view the data on the receiver box, or you can view and manipulate the data on the computer using the ALOHA® plume model software.

### DISPLAY SCREEN

Size: 4 × 20 characters

Type: LCD (Liquid Crystal Display) with EL backlighting

Data Output: Running 5 minute averages of wind speed and direction, stability class, and air temperature, instantaneous wind speed and direction, air temperature, humidity, and barometric pressure, and the WEATHERPAK®'s unique ID number.

Dimensions (Receiver/Display Unit):

4.5" H × 8.25" W × 5.25" D

6.0 lbs.
