## COASTAL ENVIRONMENTAL SYSTEMS Coastal Works While the All Stars Play!

**Seattle, WA:** This week and next, Coastal Environmental Systems will begin shipping SAWS weather stations to the FAA. These units are the first ordered under the FAA's option. The original 125 stations have been built and shipped, and now the first 25 of 161 option stations, which include 262 flat panel displays, are ready to go.

As you can see from the aerial photo below – you could almost throw a baseball and hit Seattle's new retractable roof baseball stadium, host to this years All Star game. Normal games, which means the Mariners win, cause some shipping inconveniences for Coastal, as most streets around our facility are shut down. Special plans need to be made ahead of time to allow shippers in and out of the area during game days. However, due to the crowds expected for the All Star game, Coastal must schedule all of their shipping around that day!

The remainder of the SAWS weather stations are planned to be built and shipped throughout the summer months.

**For Immediate Release**
