COASTAL ENVIRONMENTAL SYSTEMS, INC.

Record Number of Portable Weather Stations Ordered

Seattle, WA: Coastal Environmental Systems, Inc. set a company record, taking orders for over 40 portable WEATHERPAK[®] Weather Stations for the month of September. “The largest order was for 11 systems, however the majority were single system orders,” remarked Jim McGregor, a Coastal Domestic Portable Weather Station salesman.

The biggest orders came from the U.S. Navy First Responders (for rapid deployment), the State of Idaho Military Division (7 units), MARC (Mid-America Regional Council), an association of city and county governments for the bi-state Kansas City region (7 units - for Homeland Security), the University of North Carolina (7 units), and 5 more for Air Force or Air National Guard Bases. Added to that, 4 WEATHERPAK[®]s were sold to the Singapore Civil Defense and 3 more to the CCIST (DoD) in Taiwan, bringing the total for both Domestic and International orders to almost 50 stations!

The WEATHERPAK[®] is noted for its quick set-up time, “bullet-proof” durability, and intuitive, simple-to-use features. Most of the units sold communicate by radio for up to 7 miles line-of-site. Of the almost 50 stations sold, 8 were the new [WEATHERPAK[®] MTR](#) with an ultrasonic wind monitor (no moving parts) and a flat panel, touch screen color display/base station.
