

## Back Pack Style Transport Case S9292

The soft side backpack transport case is made so that one person can easily transport the entire weather station. The case can accommodate all the sensors, the enclosure, battery (power supply if provided), cables, connectors and even a solar panel (optional). This all packs into a case with two back-pack style straps and can easily be carried on your back. The case has individual cut-out foam and is zippered and or Velcro closed.

It is suitable for shipping or transporting the station to any location.

The size can vary depending on application but is typically 18 by 36 x 12 inches (46 x 91 x 30 cm)
